For Wednesday read

1. Java Bootcamp
2. Look at Java4Python
3. Weiss Chapter 1

The Java Bootcamp notes were written about 10 years ago by one of our former faculty members. They have the transition from 150 to 151 in just 8 pages. Java4Python is a much longer document from the Net that does the same thing. There are links to both of these documents on the class home page: www.cs.oberlin.edu/~bob/cs151

Also, note that the CS department is having a welcome back event at 4:30 on Wednesday. This will be somewhere in King; I’ll announce the room on Wednesday. Even if you aren’t a major you are welcome to come.
